Advanced driver-assistance systems (ADAS) are electronic systems that assist drivers in driving and parking functions. Through a safe human-machine interface, ADAS increase car and road safety. ADAS systems use automated technology, such as sensors and cameras, to detect nearby obstacles or driver errors, and respond accordingly.

While the terms EHR (electronic health records) and EMR (electronic medical records) are often used interchangeably, they have slightly different meanings. The primary difference is that EHR puts forth the notion of interoperability, or interfacing with other medical systems to create a comprehensive view of a patient's clinical information.
